What Is MetroScript?

MetroScript is a Transcription Application Service Provider (TASP). We offer a secure web site to allow transcription companies to exchange digital files with their clients (doctors, lawyers). These files are typically voice files (usually WAV or DSS or DVF format) and finished transcribed documents (usually WORD or WordPerfect format).

Fully HIPAA compliant secure web interface
Proud to be 100% U.S.A. based
Toll free phone-in dictation feature
No FTP accounts needed and no software to install

How Can MetroScript Help Your Business?

The MetroScript service can be a valuable asset for transitioning your business to the digital world.

- Operate your business more efficiently -- No more driving around town to pick up tapes and drop off reports.
- Promote your business -- Use the "branding" feature to advertise your business and to showcase the service as your own. This also adds a layer of credibility to your business.
- Organize your business -- Use MetroScript's file management, work delegation, and review cycle features to keep your business running smoothly.
- Grow your business -- Pick up clients from across the country as geography is no longer a concern. Give clients the option of uploading files from their hand held recorders or to use the toll free phone-in dictation feature.

Can I Afford MetroScript?

Our client list includes large transcription companies, one-person shops working out of their home, and everything in between. Since you are charged purely for your usage, our service fits every budget. We have a reasonable set up fee (\$24.95) and offer free user accounts for your employees and clients.

**Sign up at www.MetroScript.com and get started today
for as little as \$14.95 per month.**
